EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

Allowable Subject Matter

1. Claims 1-32 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The applicant's invention is geared toward a multi-band communication device having at least a first antenna operatively connected to a first transmission path for transmitting a first transmit frequency band and a second transmission path for transmitting a different second transmit frequency band; and a second antenna, electrically separated from the first antenna, operatively connected to a first reception path for receiving a first reception frequency band and a different second reception path for receiving a second reception frequency band. The closest prior art is KLEMETTI et al (US 2004/0162107 A1). KLEMETTI et al teaches the above subject matter (see figure 5). However, the applicant additionally includes the subject matter that the first receive frequency band is partially overlapped with the first transmit frequency band. Upon initial inspection of KLEMETTI et al's figure 5 it would appear that KLEMETTI et al teaches this limitation, however this is not the case. For KLEMETTI et al to teach the limitation, a WCDMA signal from element 102 would have to be transmitted from antenna 11. On the contrary, KLEMETTI et al clearly teaches that a WCDMA signal from element 102 is only transmitted from antenna 12 (see paragraph 49). Thus, the subject matter is neither taught nor suggested by KLEMETTI et al. Moreover, no additional prior art has been discovered that would anticipate or render obvious the

claim. Therefore, the applicant's invention of claim 1, when considered in its entirety, comprises a unique combination of subject matter that is neither taught nor suggested by the prior art. Claims 25 and 31 comprise subject matter similar that that of claim 1 are and therefore allowed for the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
